Effects:

ROYCE contain % 70 of your daily need of vitamin B.

Is is strengthened with amino acids like taurin, inositol, carbohydrates like glucuronolactone and vitamins B2, B3, B5, B6, B12. When your body needs more energy, when you loose your endurance and performance Royce is there to replenish you and keeps you focused.

Royce Energy Drink helps your body to get harmful substances out of your system.

Recharges your body and mind.

What happens to your soul when these are happening to your body? It gets spoiled with life...

Ingredients; water, sugar (glucose/sucrose syrup), carbon dioxide, citric acid, caffeine,(max. 150mg/lt), taurin (800 mg/lt.), inositol, gluconalactone (20mg/lt), aroma, preservatives; potassium sorbet and sodium benzonat, food coloring, caramel, vitamins; niacin, pantothenic acid, B6, B2 and B12.

When should I consume Royce?

Anytime when you want to increase your energy and concentration! To get the best results, consume Royce Energy before an intense and ongoing physical activity. For example, to stay alert during long travels, to stay strong during hard workouts, to keep up with busy workdays or before an exam.

Recommended intake is one can 30 minutes before an intense activity. That is because it takes 30 minutes for your body to respond and energize.

Can I drink Royce instead of water?

No, ROYCE is an Energy Drink. It is not formulated to replace your body water. It is very important to drink water during long and ongoing physical activity. Since energy drinks are not formulated to replace your lost body water, people who are physically active should drink lots of water.

How many Royce energy drink can I consume per day?

Energy drinks are functional drinks; they don't quench your thirst. In general, it is similar to the digestion of coffee, so it is another way to decide how much one should drink. We suggest that your energy drink consumption should be maximum of 500ml per day.

Is Royce suitable for vegetarian diet?

Yes it is. It does not include dairy products, eggs or meat.

What is the difference between energy drinks and sport drinks?

Energy drinks do not replace the lost body water but sports drinks are formulated just to do that. Sports drinks do not contain taurin, caffeine or carbohydrates but energy drinks contain these elements to increase your energy and reaction speed.
